Want to achieve a deep sweat faster?

Using Pure Sweat during a sauna session & workouts can substantially improve, circulation, energy, and sweating, activate slow to respond areas and accelerate warm up and recovery time for a more effective sauna session or workout.

These effects help bring the skin's natural nutrients to the surface while flushing out unwanted impurities. Applying Pure Sweat to problem areas (such as upper thighs & hips for women and stomach & the sides of the waist for men) activates circulation & intensifies sweating for faster results.

Pure Sweat's ingredients also include a variety of beneficial antioxidants and moisturizers such as Pomegranate, Acai, COconut Oil, Kosher Jojoba Oil, Squalane Oil, and Vitamin E.

How to Apply:

Before sauna session, apply ample amount over desired areas without rubbing into the skin. Pure Sweat can be used under workout clothing, and even while swimming. Wipe off towel when session ends.

Thermographic Study:

The image to the right shows the effect in **20 minutes** in your sauna using Pure Sweat.

Notice the substantial increase in circulation to the side where the Pure Sweat was applied.

Pure Sweat may be used as often as you like, preferably daily with your sauna.

There are no harmful side effects from use.
